

29.1. Vocabulary. Fill in the blanks:

A man has a sausage stand directly ...*opposite*... a bank. An old comes and asks him: "Can you me some money?" - "I'm sorry, I can't." - "And not?" - ".....I have a with the bank." - "What of contract?" - "I don't lend any and they don't any sausages!"

29.2. Odd one out:

window	wall	floor	fly
monitor	cucumber	printer	scanner
England	Scotland	Ireland	Sweden
carrots	sausages	potatoes	beans
finger	eye	knee	fence
friendly	electric	nice	pretty
concrete	duck	turkey	goose
yellow	purple	pink	bright
politician	farmer	fisherman	hunter
badminton	billiards	wrestling	sleeping
scream	know	sing	laugh
belt	glove	stairs	shirt

9.2. Wrong information. Find five fakes:

The Earth is a planet that travels round the Sun. It takes a year (about 365 days) to go all the way round once. In winter it goes faster. At the same time, the Moon travels round the Earth. It does this in a square. It takes 28 days (about one month) to go round once. The sun is a giant ball of very hot gases. Huge flames shoot out from its surface. The flames are thousands of kilometres high. Just a few people live on the Sun. The Moon measures about a quarter of the size of the Earth. It is very hot on the Moon by day. It is very cold at night. The Man in the Moon is the only living human there. Moonlight is light from the Sun reflected off the surface of the Moon. The sun always lights up half the Moon. But as the Moon travels round the Earth, we see different amounts of its bright side. This is why the Moon seems to change shape. Once a year we can see a full Moon.
