

Atlanta, Georgia, in 1886. The pharmacist John Pemberton goes to his back garden. There he invents a new drink. He thinks it's good for the health. He calls it Coca-Cola. He sells it for 5 cents a glass.

A clever businessman buys the recipe for seven hundred dollars. Four months later Pemberton dies.

The businessman decides to advertise the drink. There are Coca-Cola advertisements everywhere in Atlanta. It's a very hot summer. So,

the new drink becomes more and more popular. In three years, the businessman is a millionaire. In 1919 he sells the company. The price is twenty-five million dollars.

Today, it's the world's most popular soft drink. People in more than 200 countries drink 300 million "Cokes" every day. And it's still made from the recipe that Dr John Pemberton invented in his back garden.
